

PLAYER GUIDE

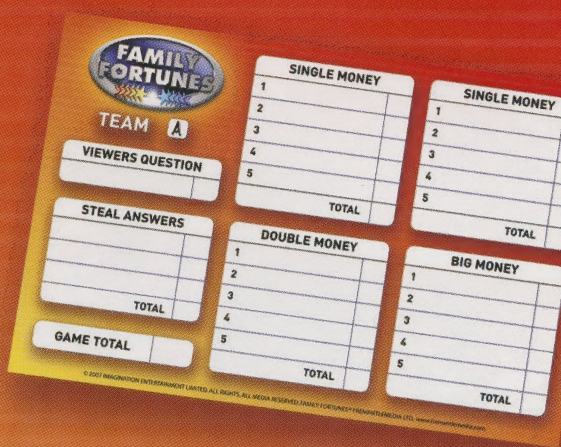

OBJECT OF THE GAME

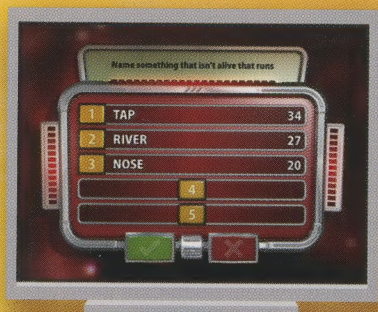

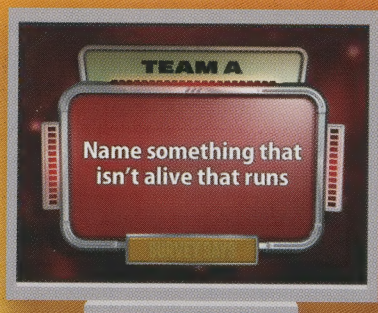

To be the team with the most money at the end of the game.

GETTING STARTED

Form two teams – Team A and Team B. Have your score sheets and pens ready to write down your answers and keep track of your scores, then place the DVD into your player.

The image shows a 'Family Fortunes' game score sheet. It is divided into several sections for two teams, A and B. At the top, there is a 'TEAM A' label. Below it are sections for 'VIEWERS QUESTION', 'STEAL ANSWERS', and 'GAME TOTAL'. To the right of these are four 'SINGLE MONEY' sections, each with a list of numbers 1 through 5 and a 'TOTAL' box. Below these are two 'DOUBLE MONEY' and 'BIG MONEY' sections, each with a list of numbers 1 through 5 and a 'TOTAL' box. At the bottom, there is a small copyright notice: '© 2007 MAGNUM PICTURES ENTERTAINMENT LIMITED. ALL RIGHTS RESERVED. FAMILY FORTUNES™ MAGNUM PICTURES LTD. www.familyfortunes.com'.

PLAYING THE GAME

There are five rounds in each game. Rounds one and three are SINGLE MONEY. Round two is a bonus VIEWERS QUESTION. Round four is DOUBLE MONEY, and the final round is BIG MONEY.

Team A plays first, and selects the START button on the main menu using the DVD remote. After a brief introduction, the first question is revealed.

Team A now has a short time to list, in any order, what they think are the top five answers.

Meanwhile, Team B writes down one answer in the STEAL ANSWERS section of their score pad. It's with this answer Team B hopes to "steal the round", should Team A get any of the survey answers incorrect.

When the music stops, Team A selects the on-screen SURVEY SAYS button using the remote control and the most popular survey answer is revealed.

If Team A has that answer listed, they write down the value on their score sheet, and select the 'right answer'

button  to reveal the next most popular answer. This process continues for each correct answer, until all five are revealed on the board.

If Team A matches all five survey answers (in any order), they win the round and the money. The DVD remote is now passed to Team B so they can play their first Single Money round.

Note, in this example, Team B's STEAL ANSWER was not required as Team A had all five responses written down.

If Team A reveals an answer on the board that they do not have written down, they select the 'wrong answer' button  and pass the remote to Team B. Team B now has the opportunity to 'steal the round', and more importantly, the money.

STEALING THE ROUND

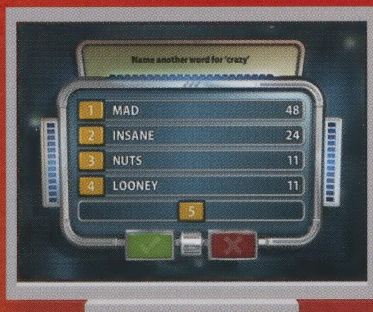

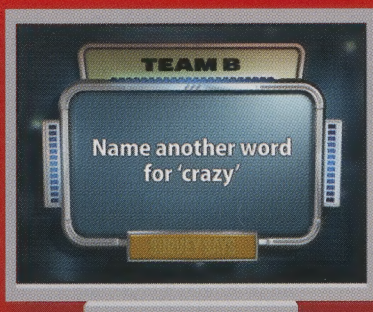

If a team gets one of the five survey answers incorrect, the opposition announces their STEAL ANSWER, and uses the remote to reveal the remaining answers on the board.

If the STEAL ANSWER matches any of the remaining answers, that team "steals the round" and takes the money for any answers the other team had answered correctly, plus the money earned for their 'Steal' answer.

The team whose money was "stolen" earns nothing for that round. If a STEAL ANSWER is not on the board the team playing keeps the money they've already received for their correct answers from that round.

Note, after each correct answer is revealed on the board, a team can decide whether to keep their STEAL ANSWER, or replace it with a new one. Maybe their answer has been revealed already, or they've thought of a better one.

Obviously, the STEAL ANSWER cannot be changed after the last answer (Answer 5) has been revealed.

VIEWERS QUESTION

Both teams play at the same time, and only need to get the top response to the question. When time is up, use the remote to reveal the top answer.

If either team picks the top answer they can score the bonus 50 points. Both teams can score the points, but an incorrect answer scores nothing.

DOUBLE MONEY

This round is very similar to the SINGLE MONEY rounds, except this time as the name implies, there's twice as much money to be won!

BIG MONEY

The final round and both teams play at the same time. Each team nominates their best player to write down the answers.

They'll need to write down the top survey answer to five separate questions, and will only have a limited time to answer

For every correct answer, teams earn the money value shown. A wrong answer receives no money, and if both teams have the same answer, both get the money.

WINNING THE GAME

At the end of the final round (BIG MONEY), add up all your winnings. The team with the most money wins the game. Good luck and have fun!

ALREADY PLAYED A GAME?

Each time you play Family Fortunes the DVD player randomly chooses the game for you. If you think you have seen a set of questions before, press the 'Menu/Title' button on your DVD remote and this will enable you to start a new game, or allow you to continue with the game you're already playing.
